# WHO ARE WE?

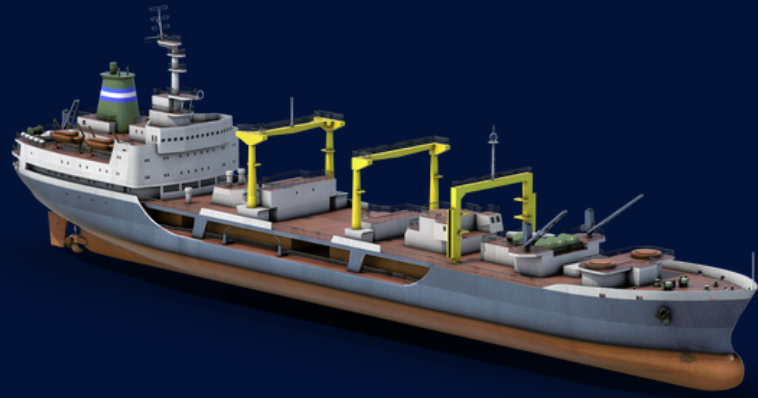

We are a reliable team that works as commercial intermediaries in the import of products from the five continents with official quality certification. Our services include complete or partial solutions, always adapted to your needs and interests. Not only will we find the product you require at a cost-effective price, but we will also inspect its quality, export, transport and import it, to finally deliver it directly to your door or your company.

Whether you are trading agricultural goods, oil, gas, chemicals, minerals, food, coal, biofuels, steel or fertilizers, there are many factors to consider. Culture, language, logistics or other small inconveniences are elements that may deter you from your intention. If you want to import products from another country, it is advisable to plan well the production, select the right supplier, analyze prices and be aware of the procedures and times.

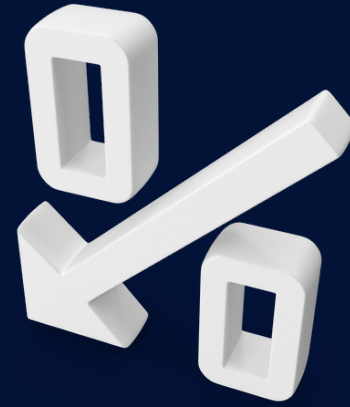

Using our services can save you a lot of time and money. Trying to do everything yourself often leads to higher import costs, as well as many other problems that can arise during the process: including delivery of poor quality goods, higher transportation costs, transactions with false accounts, higher final cost of import goods, etc.

## MARKETS

We facilitate entry to other markets, connections and alliances.

## COSTS

Minimize efforts, prices and time for a better result.

## TRANSACTIONS

Secure international transactions with no risk, scalable and fast execution.

# OUR COMMODITIES

# ENERGETICS
